Dear Frank

I received as a gift a copy of your "Lil Dipit" skimmer dipper and felt compelled to write you with my comments and observations.

The skimmer dipper has turned out to be quite a handy item as it allows me to check and empty my skimmer baskets without bending or stooping which was really nice recently while I was nursing a back injury. Also, though, I appreciate being able to be back some distance as I open the skimmer top since we occasionally have snakes, mice, insects, etc. to "visit" our pool, and I can avoid the start of discovering these visitors within arm's reach. Live snakes and frogs can easily be handled with either the basket end or the hook end.

I wish you continued good luck with the "Lil Dipit" and would like to see it in local pool supply stores soon, as several of my friends and acquaintances have asked where they might be able to find one.

Sincerely,

A handwritten signature in black ink, appearing to read 'HLS', with a long horizontal flourish extending to the right.
